Commercial Vessel Risk and Safety Management WORKSHOP

The Commercial Vessel Risk and Safety Management Workshop aims to provide participants with an understanding of the benefits of implementing a Safety Management System (SMS) for their operation. In addition, it provides participants with the foundation skills to identify and manage risk and then develop and implement a simple but effective SMS.

Date: Thursday, 17 September 2015

Location: The Royal Queensland Yacht Squadron, 587 Royal Esplanade, Manly

Time: 8.30 am arrival for 9.00 am start – concludes 3 pm

Cost: Free – lunch provided

What's in it for you?

- Learn how to create or improve your Safety Management System (SMS) documents to align them with requirements of the National Standard for Commercial Vessels (NSCV) Part E - Operations
- Improve your capacity to carry out a risk assessment
- Learn how to use your SMS to effectively manage and control risks
- Use risk assessment to determine appropriate crew numbers
- Learn easy ways to increase your crew's understanding of your SMS

What can you expect?

- To work with other Domestic Commercial Vessel (DCV) owners and crew in an informal setting
- To benefit from the collective experience and knowledge of other DCV owners and crew
- To carry out a risk assessment in a no nonsense way, guided by qualified staff from your local Marine Safety Agency and AMSA.

Workshop registration

Reserve your seat by calling 02 6279 5000 (option 3) or via email at operationalsafety@amsa.gov.au. Registrations close Friday 11 September 2015.
